

WATCH DISPLAY

TIMESSETTING

- A - Day Dial
- B - Day Setting Button
- C - Crown
- D - Month Dial
- E - Month Setting Button
- F - Date Window

This watch features three distinct watch face displays: day dial, month dial and a date window.

IMPORTANT

1. Before the watch is worn for the first time, wind the crown, by hand, 15 to 20 cycles by turning the crown clockwise (away from you) while in the "0" (zero) position. Be careful NOT to overwind as it may damage the main-spring.

1. Locate the crown on your watch (part C). Please note the three crown positions (0-1-2) in part C of the diagram.

2. To set the date (part F): Pull the crown (part C) out to the "1" position and rotate the crown counterclockwise (toward you) for proper date selection.

3. To set the time: Pull crown (part C) out to position "2" and rotate for proper time selection. Once time is set, push crown back into original "0" (zero) position.

4. To set the month dial (part D): Press the Month Setting Button (part E) to advance the hand. The month hand will advance one month at a time after each press of the button.

5. To set the day dial (part A): Press the Day Setting Button (part B) to advance the hand. The day hand will advance one day at a time after each press of the button.

IMPORTANT

Please remember to wear your Stauer watch each day to ensure its lifelong accuracy and dependability for your timekeeping needs. By continually wearing your Stauer watch, you will be taking full advantage of its state of the art automatic winding feature which allows the watch to function on kinetic power (simple body movement). The kinetic movement enables your Stauer watch to never require batteries and never require additional winding after it has been initially wound for the first time. Your Stauer watch will stop running if it is not properly kept in motion by daily wear. It can, however, be reactivated simply by instilling motion by being worn. When not wearing the watch, resting the watch on its side (with the crown facing towards the ceiling) will help to keep more accurate time.

FEATURES
